

phantom

The PHANTOM through desk unit utilises the office furniture industry standard 80mm cable port aperture to provide a hideaway location for power and data. When closed, PHANTOM keeps the desktop clear and uncluttered.

Operating on a low friction ball slide the unit may be pulled up from beneath the worksurface to access the power and data connections. The unit can be used in the open position or in the closed position when most standard plug types are inserted. When closed provides a neat cable exit facility.

Standard colours – Matt black body - black fascias and end caps.

Other colours available on request – may be subject to minimum order quantity.

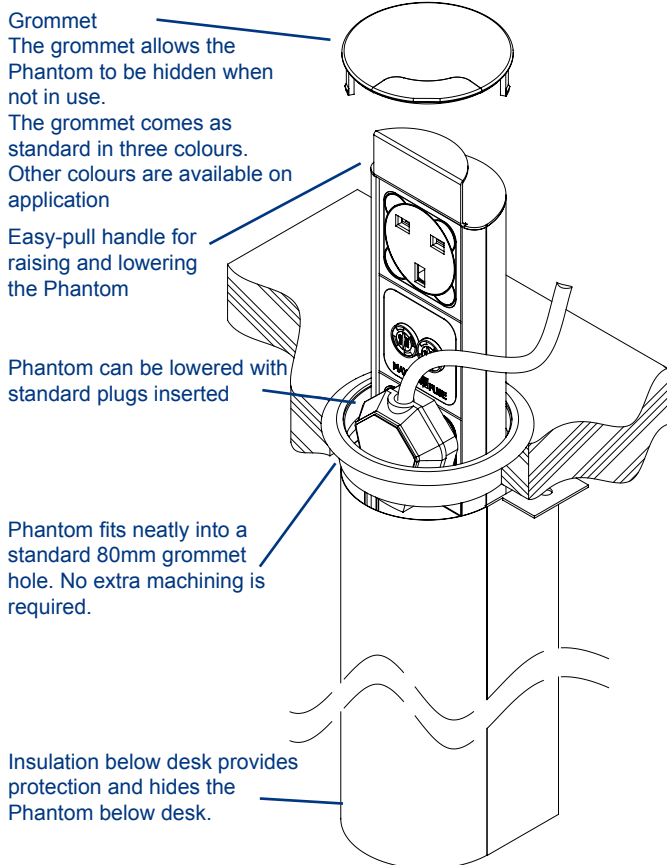

All Office Electrics products are manufactured to enable compliance with BS6396 or BS7671 where relevant.

Features

Configuration:

Power only / Data only / Combined (Power & Data/AV)
Internal segregation between Power and Data/AV in combined PHANTOM

Insulation:

Fully earthed aluminium casing with fire retardant ABS fascias. A 2000V protective membrane is incorporated.

Earth Bonding:

A earth bond lead can be fitted on request.

Fusing: (to enable compliance to BS6396)

5 x 20mm anti-surge ceramic fuses, with colour-coded fuseclips to denote the rating (3.15A/5A)

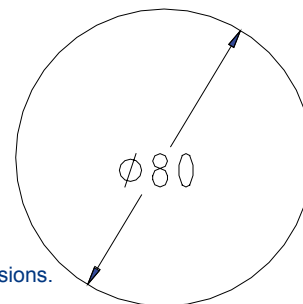

Testing:

100% testing - continuity, polarity, insulation & earth

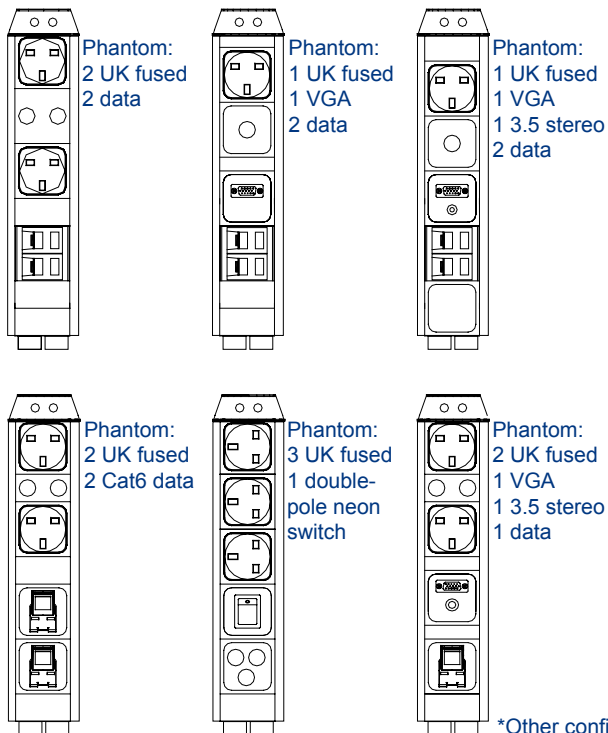

Soft Wiring (power)

Power wired to Wieland ST/GST connector allows starter cables to be changed to suit requirements, especially use during moves and changes (CHURN)

Phantom is fitted to the underside of the desk/table with screws.
